

# ÚŘAD PRO CIVILNÍ LETECTVÍ

## SEKCE TECHNICKÁ

### PŘÍKAZ K ZACHOVÁNÍ LETOVÉ ZPŮSObILOSTI

**Číslo: 2010-0164**

Ruší EASA AD 2009-0141

Účinnost od: 19. srpna 2010

**AIRBUS**

**A318, A319, A320, A321**

---

Tento PZZ je vydáván pro výrobek transferovaný pod působnost EASA.

Na základě rozhodnutí EASA je následující Příkaz k zachování letové způsobilosti závazný pro všechny výrobky provozované v EU na které se daný PZZ vztahuje.

Provedení PZZ, který se vztahuje podle typu a výrobního čísla na výrobek je pro provozovatele/vlastníka letadla zapsaného do leteckého rejstříku závazné. Neprovedením PZZ ve stanoveném termínu dojde ke ztrátě letové způsobilosti výrobku.

---

**Poznámky:**

- Provedení tohoto PZZ musí být zapsáno do provozní dokumentace letadla.
- Případné dotazy týkající se tohoto PZZ adresujte na UCL sekce technická.
- Pokud to vyžaduje povaha tohoto PZZ, musí být zpracován do příslušné části dokumentace pro obsluhu, údržbu a opravy letadla.

EASA	AIRWORTHINESS DIRECTIVE
	<b>AD No.: 2010-0164</b>
<b>Date: 05 August 2010</b>	
<p>Note: This Airworthiness Directive (AD) is issued by EASA, acting in accordance with Regulation (EC) No 216/2008 on behalf of the European Community, its Member States and of the European third countries that participate in the activities of EASA under Article 66 of that Regulation.</p>	
<p>This AD is issued in accordance with EC 1702/2003, Part 21A.3B. In accordance with EC 2042/2003 Annex I, Part M.A.301, the continuing airworthiness of an aircraft shall be ensured by accomplishing any applicable ADs. Consequently, no person may operate an aircraft to which an AD applies, except in accordance with the requirements of that AD unless otherwise specified by the Agency [EC 2042/2003 Annex I, Part M.A.303] or agreed with the Authority of the State of Registry [EC 216/2008, Article 14(4) exemption].</p>	
<b>Type Approval Holder's Name :</b> AIRBUS	<b>Type/Model designation(s) :</b> A318, A319, A320 and A321 aeroplanes
TCDS Number : EASA.A.064	
Foreign AD : Not applicable	
Supersedure : This AD supersedes EASA AD 2009-0141 dated 02 July 2009.	
<b>ATA 55</b>	<b>Stabilizers – Rudder Side Shell Skin – Inspection</b>
Manufacturer(s): Airbus (formerly Airbus Industrie)	
Applicability:  AIRBUS A318-111, A318-112, A318-121, A318-122, A319-111, A319-112, A319-113, A319-114, A319-115, A319-131, A319-132, A319-133, A320-111, A320-211, A320-212, A320-214, A320-215, A320-216, A320-231, A320-232, A320-233, A321-111, A321-112, A321-131, A321-211, A321-212, A321-213, A321-231 and A321-232 aeroplane models, all manufacturer serial numbers, if equipped with rudders having part numbers (P/N) and serial numbers (S/N) as listed in Appendix A, B, C, D, or E to this AD.	
Reason:  Surface defects were visually detected on the rudder of one A319 and one A321 in-service aeroplane.  Investigation has determined that the defects reported on both rudders corresponded to areas that had been reworked in production. The investigation confirmed that the defects were a result of de-bonding between the skin and honeycomb core.  An extended de-bonding, if not detected and corrected, may degrade the structural integrity of the rudder. The loss of the rudder leads to degradation of the handling qualities and reduces the controllability of the aeroplane.  EASA AD 2009-0141 required inspections of specific areas and, when necessary, the application of corrective actions for those rudders where production reworks have been identified.  This AD retains the requirements of EASA AD 2009-0141 (addressing the populations of rudders affected by AOT A320-55-1038), which is superseded, and requires:	

	<ul style="list-style-type: none"> <li>- a local ultrasonic inspection for reinforced area instead of the local thermography inspection, which is maintained for non-reinforced areas, and</li> <li>- additional work performance for rudders on which this thermography inspection has been performed in the reinforced area, and</li> <li>- additional work performance for some rudders on which an additional area requiring inspections is defined.</li> </ul> <p>This AD also addresses the populations of rudders affected by AOT A320-55-1039 and Airbus SB A320-55-1035, A320-55-1036 and A320-55-1037 which were not included in EASA AD 2009-0141.</p>
Effective Date:	19 August 2010
Required Action(s) and Compliance Time(s):	<p>Required as indicated:</p> <p class="list-item-l1">(1) <b><u>For rudders with a honeycomb core density of 24 kg/m<sup>3</sup> as identified in Appendix A to this AD, apply the following actions for the locations defined in Airbus All Operators Telex (AOT) A320-55A1038 Revision 02:</u></b></p> <p class="list-item-l2">(1.1) Reinforced area location: Unless already accomplished, within 200 days from 16 July 2009 [effective date of AD 2009-0141], perform Vacuum Loss inspection on the rudder reinforced area in accordance with instructions defined in Airbus AOT A320-55A1038 Revision 02.</p> <p class="list-item-l2">(1.2) Trailing edge area location: (1.2.1) Unless already accomplished, within 20 months from 16 July 2009 [effective date of AD 2009-0141], perform Elasticity Laminate Checker inspection on the rudder trailing edge area in accordance with instructions defined in Airbus AOT A320-55A1038 Revision 02. (1.2.2) Repeat two further times the inspection defined in paragraph (1.2.1) of this AD at intervals not to exceed 4 500 flight cycles (FC) but not less than 4 000 FC from the last inspection.</p> <p class="list-item-l2">(1.3) Other areas locations (splice/lower rib/upper edge/leading edge/other locations): (1.3.1) Unless already accomplished, within 200 days from 16 July 2009 [effective date of AD 2009-0141], perform Elasticity Laminate Checker inspection on the other areas (splice/lower rib/upper edge/leading edge/other locations) in accordance with instructions defined in Airbus AOT A320-55A1038 Revision 02. (1.3.2) Repeat the inspection defined in paragraph (1.3.1) of this AD at intervals not exceeding 1 500 FC or 200 days from the last inspection, whichever occurs first. (1.3.3) Unless already accomplished, within 20 months from 16 July 2009 [effective date of AD 2009-0141], perform Vacuum Loss inspection on these areas (lower rib/upper edge/leading edge/other locations) in accordance with instructions defined in Airbus AOT A320-55A1038 Revision 02. (1.3.4) Accomplishment of the inspection required by paragraph (1.3.3) cancels the initial and repetitive inspections required by paragraph (1.3.1) and (1.3.2) of this AD.</p>

- (1.4) In case of findings during the inspections defined in paragraphs (1.1), (1.2) or (1.3) of this AD, before next flight, contact Airbus to get further instructions and apply the associated instructions and corrective actions in accordance with the approved data provided.
- (1.5) In case of no findings during the inspection defined in paragraphs (1.1) and (1.3.3) of this AD, before next flight, restore the vacuum loss holes as per the option selected (temporary restoration with self adhesive patches, temporary restoration with resin or permanent restoration), in accordance with Airbus AOT A320-55A1038 Revision 02 and apply the associated instructions until performance of permanent restoration.
- (1.6) Within 10 days after accomplishment of each inspection in accordance with paragraphs (1.1), (1.2) or (1.3) of this AD, report the inspection results, including no findings, to Airbus.
- (2) **For rudders not having a honeycomb core density of 24 kg/m<sup>3</sup> as identified in Appendix A to this AD, apply the following actions for the locations defined in Airbus AOT A320-55A1038 Revision 02:**
- For the purpose of the paragraph (2), a Reference Date is 16 July 2009 [effective date of AD 2009-0141] or the date when the rudder will accumulate 20 000 FC from its first installation on an aeroplane, whichever occurs later.
- (2.1) Reinforced area location:  
Unless already accomplished, within 200 days from the Reference Date, perform Vacuum Loss inspection on the rudder reinforced area in accordance with instructions defined in Airbus AOT A320-55A1038 Revision 02.
- (2.2) Trailing edge area location:  
 (2.2.1) Unless already accomplished, within 20 months from the Reference Date, perform Elasticity Laminate Checker inspection on the rudder trailing edge area in accordance with instructions defined in Airbus AOT A320-55A1038 Revision 02.  
 (2.2.2) Repeat two further times the inspection defined in paragraph (2.2.1) of this AD at intervals not to exceed 4 500 FC but not less than 4 000 FC from the last inspection.
- (2.3) Other areas locations (splice/lower rib/upper edge/leading edge/other locations):  
 (2.3.1) Unless already accomplished, within 200 days from the Reference Date, perform Elasticity Laminate Checker inspection on the other areas (splice/lower rib/upper edge/leading edge/other locations) in accordance with instructions defined in Airbus AOT A320-55A1038 Revision 02.  
 (2.3.2) Repeat the inspection defined in paragraph (2.3.1) of this AD at intervals not exceeding 1 500 FC or 200 days from the last inspection, whichever occurs first.  
 (2.3.3) Unless already accomplished, within 20 months from the

	<p>Reference Date, perform Vacuum Loss inspection on these areas (lower rib/upper edge/leading edge/other locations) in accordance with instructions defined in Airbus AOT A320-55A1038 Revision 02.</p> <p>(2.3.4) Accomplishment of the inspection required by paragraph (2.3.3) of this AD cancels the initial and repetitive inspections required by paragraph (2.3.1) and (2.3.2) of this AD.</p> <p>(2.4) In case of findings during the inspections defined in paragraphs (2.1), (2.2) or (2.3) of this AD, before next flight, contact Airbus to get further instructions and apply the associated instructions and corrective actions in accordance with the approved data provided.</p> <p>(2.5) In case of no findings during the inspection defined in paragraphs (2.1) and (2.3.3) of this AD, before next flight, restore the vacuum loss holes as per the option selected (temporary restoration with self adhesive patches, temporary restoration with resin or permanent restoration), in accordance with Airbus AOT A320-55A1038 Revision 02 and apply the associated instructions until performance of permanent restoration.</p> <p>(2.6) Within 10 days after accomplishment of each inspection in accordance with paragraphs (2.1), (2.2) or (2.3) of this AD, report the results, including no findings, to Airbus.</p> <p>(3) All rudders that have passed the inspection, before 16 July 2009 [effective date of AD 2009-0141], in accordance with the instructions of Airbus AOT A320-55A1038 at original issue or Sampling instruction Technical Disposition (TD) ref. TD/K4/S2/27051/2009 issue B (applicable only to rudder S/N TS-1536, having P/N D554 71000 020 00), are compliant with the associated requirements of paragraph (1) or (2) of this AD for the areas inspected. Additional areas requiring inspection are defined in AOT A320-55A1038 at Revision 01 or Revision 02. For these additional areas the requirements of paragraphs (1) or (2) of this AD are applicable. For all areas, the repetitive inspections required by paragraphs (1) or (2) of this AD remain applicable.</p> <p>(4) All rudders that have passed the inspection, before the effective date of this AD, in accordance with the instructions of Airbus AOT A320-55A1038 Revision 01, are compliant with the associated requirements of paragraph (1) or (2) of this AD for the areas inspected. Additional areas requiring inspection are defined in AOT A320-55A1038 at Revision 02. For these additional areas the requirements of paragraphs (1) or (2) of this AD are applicable. For all areas, the repetitive inspections required by paragraphs (1) or (2) of this AD remain applicable.</p> <p>(5) For rudders on which temporary vacuum loss hole restoration with resin or permanent vacuum loss hole restoration has been performed before the effective date of this AD in reinforced area as per paragraph (1.5) or (2.5) of this AD, within 4500 FC from restoration date perform an ultrasonic inspection in accordance with the instructions of Airbus AOT A320-55A1038 Revision 02.</p> <p>(6) <b>For rudders listed in Appendix B to this AD, apply the following</b></p>
--	---

**actions for the locations defined in Airbus AOT A320-55A1039:**

For the purpose of the paragraph (6), a Reference Date of this AD is the effective date of this AD or the date when the rudder will accumulate 20 000 FC from its first installation on the aeroplane, whichever occurs later,

- (6.1) Unless already accomplished, within 20 months from the effective date of this AD or within 200 days from the Reference Date of this AD, whichever occurs first, and depending on the location defined in Airbus AOT A320-55A1039, perform X-Ray and/or Elasticity Laminate Checker (ELCh) and/or vacuum loss and/or thermography inspections, as applicable to rudder P/N and S/N, in accordance with the instructions of paragraph 4.2.2.1.1. of this Airbus AOT A320-55A1039.
- (6.2) Within 10 days after the accomplishment of the inspections required by paragraph (6.1) of this AD, send the developed X-Ray films and the film layout arrangement to Airbus.
- (6.3) Within 1500 Flight Cycles or 200 days after the accomplishment of the requirements of paragraph (6.1) of this AD, which ever occurs first, as applicable to rudder P/N and S/N:
  - (6.3.1) Trailing edge area location:
    - (6.3.1.1) Perform ELCh inspection on the rudder **trailing edge area** in accordance with instructions of paragraph 4.2.2.1.2. of this Airbus AOT A320-55A1039.
    - (6.3.1.2) In case of no findings, repeat two further times the inspection defined in paragraph (6.3.1.1) of this AD at intervals not to exceed 4 500 FC but not less than 4 000 FC from the last inspection.
  - (6.3.2) Other areas location (lower rib/upper edge/leading edge/other locations): Perform a vacuum loss inspection on the other areas in accordance with instructions of paragraph 4.2.2.1.2. of Airbus AOT A320-55A1039.
- (6.4) In case of findings during the inspections defined in paragraph (6.1) and (6.3) of this AD, before next flight, contact Airbus for further instructions and apply the associated instructions and corrective actions in accordance with the approved data provided.
- (6.5) In case of no findings during the vacuum loss inspection defined in paragraphs (6.1) and (6.3.2) of this AD, before next flight, restore the vacuum loss holes as per the option selected (temporary restoration with self adhesive patches, temporary restoration with resin or permanent restoration) in accordance with Airbus AOT A320-55A1039 and apply the associated instructions until performance of permanent restoration.
- (6.6) Within 10 days after accomplishment of each inspection in accordance with paragraphs (6.1) and (6.3) of this AD, report the results, including no findings, to Airbus.

**(7) For rudders listed in Appendix C to this AD apply the following actions for the locations defined in Airbus AOT A320-55A1039:**

For the purpose of the paragraph (7), a Reference Date of this AD is the effective date of this AD or the date when the rudder will accumulate 20 000 FC from its first installation on the aeroplane, whichever occurs later,

(7.1) For rudders with a honeycomb core density of 24 kg/m<sup>3</sup> as identified in Appendix C to this AD, within 200 days from the effective date of this AD, replace the affected rudder in accordance with the instructions of Airbus AOT A320-55A1039.

(7.2) For rudders not having a honeycomb core density of 24 kg/m<sup>3</sup> as identified in Appendix C to this AD, within 20 months from the effective date of this AD or 200 days from the Reference Date of this AD, whichever occurs first, replace the affected rudder in accordance with the instructions of Airbus AOT A320-55A1039.

**(8) For rudders whose P/N and S/N are listed in the Appendix D to this AD, apply the following actions for the locations defined in Airbus Service Bulletin (SB) A320-55-1035 Revision 01, or Airbus SB A320-55-1036 Revision 01, or Airbus SB A320-55-1037 Revision 01, as applicable to aeroplane model :**

(8.1) Reinforced area location:

Unless already accomplished, within the compliance time specified in paragraph (8.1.1) or (8.1.2) below, whichever occurs later of § (8.1.1) or (8.1.2), perform Vacuum Loss inspection on the rudder reinforced area in accordance with instructions defined in Airbus SB A320-55-1035 Revision 01, or Airbus SB A320-55-1036 Revision 01, or Airbus SB A320-55-1037 Revision 01, as applicable to aeroplane model :

(8.1.1) Before the rudder accumulates 17 000 FC since its first installation, without exceeding 20 months from the effective date of this AD, or

(8.1.2) Within 200 days after the effective date of this AD.

(8.2) Trailing edge area location:

(8.2.1) Unless already accomplished, within 20 months after the effective date of this AD, perform Elasticity Laminate Checker inspection on the rudder trailing edge area in accordance with instructions defined in Airbus SB A320-55-1035 Revision 01, or Airbus SB A320-55-1036 Revision 01, or Airbus SB A320-55-1037 Revision 01, as applicable to aeroplane model.

(8.2.2) Repeat two further times the inspection defined in paragraph (8.2.1) of this AD at intervals not to exceed 4 500 FC but not less than 4 000 FC from the last inspection.

(8.3) Other areas locations (splice/lower rib/upper edge/leading edge/other locations):

(8.3.1) Unless already accomplished, within the compliance time specified in paragraph (8.3.1.1) or (8.3.1.2) below, whichever occurs later of the § (8.3.1.1) or (8.3.1.2), perform Elasticity

	<p>Laminate Checker inspection on the other areas (splice/lower rib/upper edge/leading edge/other locations) in accordance with instructions defined in Airbus SB A320-55-1035 Revision 01, or Airbus SB A320-55-1036 Revision 01, or Airbus SB A320-55-1037 Revision 01, as applicable to aeroplane model :</p> <ul style="list-style-type: none"> <li>(8.3.1.1) Before the rudder accumulates 17 000 FC since its first installation, without exceeding 20 months from the effective date of this AD, or</li> <li>(8.3.1.2) Within 200 days after the effective date of this AD.</li> </ul> <ul style="list-style-type: none"> <li>(8.3.2) Repeat the inspection defined in paragraph (8.3.1) of this AD at intervals not exceeding 1 500 FC or 200 days from the last inspection, whichever occurs first.</li> <li>(8.3.3) Unless already accomplished, within 20 months after the effective date of this AD, perform Vacuum Loss inspection on these areas (lower rib/upper edge/leading edge/other locations) in accordance with instructions defined in Airbus SB A320-55-1035 Revision 01, or Airbus SB A320-55-1036 Revision 01, or Airbus SB A320-55-1037 Revision 01, as applicable to aeroplane model.</li> <li>(8.3.4) Accomplishment of the inspection required by paragraph (8.3.3) cancels the initial and repetitive inspections required by paragraph (8.3.1) and (8.3.2) of this AD.</li> </ul> <ul style="list-style-type: none"> <li>(8.4) In case of findings during the inspections defined in paragraphs (8.1), (8.2) or (8.3) of this AD, before next flight, contact Airbus to get further instructions and apply before next flight the associated instructions and corrective actions in accordance with the approved data provided.</li> </ul> <ul style="list-style-type: none"> <li>(8.5) In case of no findings during the inspection defined in paragraphs (8.1) and (8.3.3) of this AD, before next flight, restore the vacuum loss holes as per the option selected (temporary restoration with self adhesive patches, temporary restoration with resin or permanent restoration), in accordance with Airbus SB A320-55-1035 Revision 01, or Airbus SB A320-55-1036 Revision 01, or Airbus SB A320-55-1037 Revision 01, as applicable to aeroplane model, and apply the associated instructions until performance of permanent restoration.</li> </ul> <ul style="list-style-type: none"> <li>(8.6) Within 10 days after accomplishment of each inspection in accordance with paragraphs (8.1), (8.2) or (8.3) of this AD, report the inspection results, including no findings, to Airbus.</li> <li>(8.7) Aeroplanes inspected or restored in accordance with the instructions of Airbus SB A320-55-1035 at original issue, or Airbus SB A320-55-1036 at original issue, or Airbus SB A320-55-1037 at original issue prior to the effective date of this AD, are compliant with the requirements of paragraph (8) of this AD for the inspected area. For all areas, the repetitive inspections required by paragraph (8) of this AD remain applicable.</li> </ul>
	<p><b>(9) <u>For rudders whose P/N and S/N are listed in the Appendix E to this AD, apply the following actions for the locations defined in Airbus SB A320-55-1035 Revision 01, or Airbus SB A320-55-1036 Revision 01, or Airbus SB A320-55-1037 Revision 01, as applicable to</u></b></p>

	<p><b>aeroplane model :</b></p> <p>(9.1) Unless already accomplished, within 4500 FC but not less than 4 000 FC from the sampling inspection, perform Elasticity Laminate Checker inspection on the rudder trailing edge area in accordance with instructions defined in Airbus SB A320-55-1035 Revision 01, or Airbus SB A320-55-1036 Revision 01, or Airbus SB A320-55-1037 Revision 01, as applicable to aeroplane model.</p> <p>(9.2) Repeat once the inspection defined in paragraph (9.1) of this AD at intervals not to exceed 4 500 FC but not less than 4 000 FC from the last inspection.</p> <p>(9.3) In case of findings during the inspections defined in paragraphs (9.1) or (9.2) of this AD, before next flight, contact Airbus to get further instructions and apply before next flight the associated instructions and corrective actions in accordance with the approved data provided.</p> <p>(9.4) Within 10 days after accomplishment of each inspection in accordance with paragraphs (9.1), (9.2) or (9.3) of this AD, report the inspection results, including no findings, to Airbus.</p> <p>(9.5) Aeroplanes inspected or restored in accordance with the instructions of Airbus SB A320-55-1035 at original issue, or Airbus SB A320-55-1036 at original issue, or Airbus SB A320-55-1037 at original issue prior to the effective date of this AD, are compliant with the requirements of paragraph (9) of this AD for the inspected area. For all areas, the repetitive inspections required by paragraph (9) of this AD remain applicable.</p> <p><b>(10)</b> After the effective date of this AD, do not install any rudder listed in Appendix A or B or C or D or E to this AD on an aeroplane, unless in compliance with the requirements of this AD.</p>
