

PŘÍKAZ K ZACHOVÁNÍ LETOVÉ ZPŮSOBILOSTI

CAA-AD-081/2001

Datum vydání: 07. září 2001

LETOUN - KLAPKY - KONTROLA

Týká se: letadel Boeing 737-100, -200 a -200C, bez "high gross weight flaps", certifikovaných v kterékoliv kategorii.

Datum účinnosti: 01. listopadu 2001

Provést v termínech: Jak je popsáno v FAA AD 2001-16-11, od data účinnosti tohoto PZZ.

Postup provedení prací: Dle FAA AD 2001-16-11 (příloha tohoto PZZ).

Poznámky: Provedení tohoto PZZ musí být zapsáno do letadlové knihy. Případné dotazy týkající se tohoto PZZ adresujte na ÚCL technický inspektorát - Ing. Toman. Pokud to vyžaduje povaha tohoto PZZ, musí být zpracován do příslušné části dokumentace pro obsluhu, údržbu a opravy letadla. Tento PZZ byl vypracován na základě FAA AD 2001-16-11.

Ing. Pavel MATOUŠEK
Ředitel technického inspektorátu
Úřad pro civilní letectví

2001-16-11 Boeing: Amendment 39-12380. Docket 2000-NM-401-AD.

Applicability: Model 737-100, -200, and -200C airplanes without high gross weight flaps installed; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent severe flap asymmetry due to fractures of both carriage spindles at an outboard midflap, which could result in loss of controllability of the airplane, accomplish the following:

One-Time Detailed Visual Inspection

(a) Within 18 months after the effective date of this AD, do a one-time detailed visual or borescopic inspection of the outboard midflap carriage spindles for circumferential score marks per Boeing Alert Service Bulletin 737-57A1256, dated September 30, 1999.

Note 2: For the purposes of this AD, a detailed visual inspection is defined as: ``An intensive visual examination of a specific structural area, system, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at intensity deemed appropriate by the inspector. Inspection aids such as mirror, magnifying lenses, etc., may be used. Surface cleaning and elaborate access procedures may be required.''

Note 3: As specified in Boeing Alert Service Bulletin 737-57A1256, dated September 30, 1999, removal of the outboard trailing edge flaps from the airplane is necessary for the detailed visual inspection method to be used. A borescopic

inspection according to the service bulletin is acceptable if the flap carriages are not removed from the airplane.

- (1) If no scoring is found on any carriage spindle, no further action is required by this paragraph.
- (2) If any scoring is found on any carriage spindle, before further flight, rework the carriage spindle, or replace it with a new or serviceable spindle per the service bulletin.

Spares

(b) As of the effective date of this AD, no person shall install any outboard midflap carriage spindle having a part number identified in paragraph 2.E. of Boeing Alert Service Bulletin 737-

57A1256, dated September 30, 1999, on any airplane, unless the spindle has been inspected for score marks and reworked, as necessary, per the service bulletin.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 4: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Special Flight Permits

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation **Regulations** (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(e) The actions shall be done in accordance with Boeing Alert Service Bulletin 737-57A1256, dated September 30, 1999. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Effective Date

(f) This amendment becomes effective on September 25, 2001.

Issued in Renton, Washington, on August 13, 2001.

Vi L. Lipski,

Manager, Transport Airplane Directorate, Aircraft Certification Service.
