Effective Date:	21 August 2007	
Compliance:	<p>Required as indicated, at the next scheduled "A" Type maintenance inspection or within the next 3 months after the effective date of this AD, whichever occurs first.</p> <p>(1) Inspect the control bridge for cracks in areas of juncture with the two control sticks as instructed in paragraph A. of Aircraft Industries a.s Mandatory Bulletin (MB) No. L13/105a initial issue or later approved revision.</p> <p>If any crack is found, before further flight, replace the control bridge as indicated in</p>
