

Coronavirus

Before or during a flight

- **Do not fly** if you have a fever, cough, cold, difficulty breathing or flu-like symptoms

- **Share** your travel history with your health care providers

- If you feel ill while travelling, **inform** crew and seek medical care ASAP

Food safety

- **Avoid** eating **raw or undercooked** animal products (meat, milk, etc.)
- **Wash your hands** every time you handle food

Protect Yourself and Others from illness while flying – reduce the risk

- Clean hands **frequently** and well with alcohol-based hand rub or soap and water

- **Avoid** close contact with others who have a fever, cough, cold, difficulty breathing or flu-like symptoms

- When coughing and sneezing, **cover mouth and nose** with flexed elbow or tissue – **dispose** of tissue **immediately** and wash hands

- Avoid **touching** eyes, nose or mouth

IF A PASSENGER...

A. shows signs of being ill

- Make use of **protective equipment** (single use gloves and mask) when in contact with passengers exhibiting symptoms of an acute respiratory infection (cough, frequent sneezing, runny nose, sore throat, difficulty breathing)

- Use **gloves** when handling items such as used napkins, glasses and food trays.

B. is confirmed ill the crew should:

- Use the health part of the aircraft general declaration to **register the health information on-board** and submit it to the Point of Entry health authorities when required by a State's representative;

- Ask passengers to complete **passenger locator card forms** to identify where in the aircraft the passenger is seated along with information regarding their immediate travel plans and contact details*

- Recommend to passengers to **self-report** if feeling ill as described above;
