

Information Note for the Attention of National Coordinators

Dear Colleagues,

In the context of the ICAO State Letter EC 6/3 - 20/90, EASA would like to emphasise that the content of the PUBLIC HEALTH COVID-19 PASSENGER SELF DECLARATION FORM which is attached to the state letter corresponds to the content of Annex 2 'Acknowledgment of COVID-19 policy' of the EASA ECDC Aviation Health Safety Protocol (AHSP).

As you are aware, through our COVID-19 Aviation Industry Charter Programme, EASA is monitoring AHSP implementation on the basis of data and feedback provided by – at this stage - 45 airport organisations (representing approximately 150 airports) and 45 airlines operating around 45% of European air traffic. Under this Programme, we also monitor the use of Annex 2 'Acknowledgment of COVID-19 policy' of AHSP and you will find below the relevant excerpt from the initial overview of data provided by the signatories of the COVID-19 Aviation Industry Charter.

Considering the fact that ICAO is recommending electronic implementation of the content of the form as well as the fact that the implementation of the AHSP has demonstrated good results in terms of prevention of higher-risk passengers boarding the flights, we encourage the Member States to promote the implementation of Annex 2 to the AHSP by all their operators as the means to comply with the ICAO state letter mentioned above.

We remain at your disposal for further information.

Luc Tytgat
Strategy & Safety Management Director
